PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on experience building scalable full-stack web applications using the MERN stack. Strong foundation in data structures, algorithms, REST APIs, databases, and modern software engineering principles. Solved **400+ DSA problems** and developed production-ready applications featuring real-time collaboration, AI integration, and interactive analytics.

TECHNICAL SKILLS

Languages

JavaScript, C++, Python , Java

Backend

Node.js, Express.js, REST APIs, FastAPI, WebSocket, Authentication, Authorization

AI & Data

Gemini API, OpenAI API, LangChain, RAG, n8n, NumPy, Pandas, Matplotlib, Jupyter Notebook

Frontend

React.js, Tailwind CSS, HTML5, CSS3

Database Management

MongoDB , MySQL , PostgreSQL

DevOps and Tools

Git, GitHub, Postman, Docker, CI/CD Pipeline

PROJECTS

1. NextRound AI – Mock Interview Platform

- Built a full-stack AI-powered mock interview platform using the **MERN stack** and **Gemini AI** to generate role-specific interview questions (DSA, System Design, Behavioral) and evaluate responses using structured prompt-based scoring with JSON outputs.
- Developed a secure backend with **5+ REST APIs**, **JWT authentication**, and **MongoDB aggregation pipelines**, enabling interview session management, user authentication, resume analysis, and performance analytics.
- Implemented analytics dashboards and interview history tracking while optimizing the application to support **40-50 concurrent users** during testing, ensuring responsive performance and scalable API architecture.

2. LiveCodex — Real-Time Collaborative Code Editor

- Built a full-stack real-time collaborative code editor using **React**, **Node.js**, **Express**, **MongoDB**, and **Socket.IO**, enabling multi-user code editing, live chat, and code execution with support for **4 programming languages** via the **Judge0 API**.
- Implemented **WebSocket-based** real-time synchronization with **debounced auto-save**, reducing redundant database writes while providing secure role-based interview sessions and seamless collaboration.
- Deployed the application on **Vercel** and **Render**, optimizing performance to support **20-50 concurrent users** during testing with ensuring low-latency collaboration and scalable backend architecture.

3. HireLens - AI Resume Analyzer

- Built a full-stack **AI Resume Analyzer** using **React**, **Node.js**, **Express**, and **MongoDB**, integrating **Gemini AI** and **OpenAI APIs** to parse PDF resumes and generate structured feedback, including ATS scoring, skill gap analysis, and personalized improvement suggestions.
- Developed **6+ REST APIs** with **JWT authentication**, secure PDF file handling, and a modular **MVC architecture**, enabling resume processing, user management, and AI-powered analysis workflows.
- Implemented analytics dashboards and PDF report export functionality, then deployed the application on **Vercel** and **Render**, ensuring a responsive user experience and scalable backend architecture.

4. CredPilot – Loan Eligibility & Financial Analytics Platform

- Built a responsive fintech platform using **React 19**, **Vite**, **Tailwind CSS v4**, **Framer Motion**, and **Recharts**, enabling loan eligibility analysis through income evaluation, credit score assessment, repayment risk analysis, and approval probability estimation.
- Developed interactive financial dashboards featuring **EMI simulation**, **loan approval insights**, **repayment health indicators**, **lender comparison**, and **government scheme discovery**, delivering real-time financial visualizations with **8+ reusable UI components**.
- Designed a modern, mobile-first user interface with **glassmorphism**, **cinematic animations**, and **responsive layouts**, optimizing the application for mobile, tablet, desktop, and ultrawide devices with smooth performance and responsive layouts.

WORK EXPERIENCE

Internpe, SDE Intern

06/2025 – 08/2025

- Developed secure REST APIs with JWT authentication and role-based authorization.
- Built full-stack dashboards featuring CRUD operations, analytics, and responsive UI components.
- Implemented WebSocket-based real-time features and optimized database queries to improve application performance.

EDUCATION

B.Tech CSE (Data Science), Quantum University, Roorkee
(8.87 CGPA)

2023 – 2027 | Roorkee , Uttarakhand

Intermediate, Vendy Senior Secondary School
70%

04/2022 | Haldwani , Uttarakhand

Matriculation, Vendy Senior Secondary School
83.60 %

04/2020 | Haldwani , Uttarakhand

ACHIEVEMENTS

Awarded Gold Medal in Volleyball and Silver Medal in Badminton at Qualympics, Quantum University.

CERTIFICATES

- AWS Solutions Architecture Job Simulation
- Oracle Certified Data Science Professional
- Quantum Software Engineering Simulation
- Deloitte Data Analytics Job Simulation
